

November 6, 2015

The Honorable Bruce Poliquin  
United States House of Representatives  
426 Cannon House Office Building  
Washington DC 20515

Dear Congressman Poliquin,

On behalf of GE, I want to thank you for your support for legislation which reauthorized and reformed the Export Import Bank. Your vote in favor of H.R. 597 means a great deal to GE, our suppliers, and most importantly, our 440 GE Power employees located in your district.

As you know, GE makes our most innovative technology products in American factories such as the one in Bangor but sells them worldwide. The ExIm Bank is a critical tool that helps level the playing field with our global competitors and allows us to win business overseas. H. R. 597 contains the most significant reforms of the Bank since the Reagan Administration, many of which will make the Bank more transparent and financially secure.

We understand how difficult these votes in the House were, given the unconventional process. Your courage on this issue and your willingness to look at the facts in deciding to support the Bank are appreciated by all of us at GE and in the business community. As you know, ExIm reauthorization is supported by the U.S. Chamber of Commerce, the National Association of Manufacturers, the Aerospace Industries Association, and hundreds of small, medium and large manufacturers across the United States.

We look forward to final resolution of this issue in the next few weeks. Again, thank you for your strong support.

Best regards,
